Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-23, drawn to a compression system based on vector quantization, classified in class 382, subclass 253.
 - II. Claim 1-5 and 24-28, drawn to an image learning system and method, classified in class 382, subclass 159.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of the broadest subcombination claims, Claims, 1, 5, 24 and 28 are not recited in the broadest combination claims, Claims 6 and 14. The subcombination has separate utility such as feature extraction for pattern recognition.
3. If group I is elected, then the applicant is required to elect from following distinct species:
 - I.1 Claims 6-13, drawn to a vector quantization system and method, classified in class 382, subclass 253
 - I.2 Claims 14-23, drawn to parallel coding architecture, classified in class 382, subclass 234.
4. Inventions I.2 and I.1 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require

the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of the broadest subcombination claims, Claim 6 are not recited in the broadest combination claims, Claim 14. The subcombination has separate utility such as learning and training code vectors.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
